FAIRINO ROBOT

Intelligent Human - Robot Cooperation System Solutions

According to different payload and parameter, FAIRINO collaborative robots FR series are divided into six models : FR3, FR5, FR10, FR16, FR20 and FR30.

To provide partners & customers with better quality assurance, FAIRINO has obtained a more comprehensive range of certificates through international certification organizations.

Quality Management System : **ISO 9001**

Product Certification : **CR, CE, KCs, NRTL, RoHS 2.0, NSF, SEMI, IP65**

ISO Functional Safety Certification : **ISO 10218, ISO 13849, ISO 15066**

SAFETY BOX

IP Classification	IP54
Button Function	Manual/Auto, Drag, Point Record Match or Not with Safety Button BOx, Start/Stop, Shutdown
Communication	TCP/IP
Network transfer rate	100M
Power over ethernet	Standard POE
L*W*H	136*60*66mm (No protrusions)
Weight	490g (Cable weight included)
Materials	ABS
Cable length	5m
Number of Keys	≥ 20W

Human-cobot interaction tools for basis interaction functions. It can be linked with computers, tablets and other devices through the RJ45 interface, and directly log into the Web App teaching interface.

TEACH PENDANT (OPTIONAL)

IP Classification	IP54
Operating humidity	90%RH (non-condensing)
Display resolution	1280 x 800 pixels
L*W*H	268*210*88 mm
Weight	1.6kg
Materials	ABS, PP
Cable length	5m

The teach pendant, computer, tablet or mobile phone is connected to the WebApp system to realize the operation of the collaborative robot.

EXPLOSION-PROOF CABINET

Explosion-Proof Cabinets
(Integral Explosion-Proof)

Robot (full range explosion-proof)

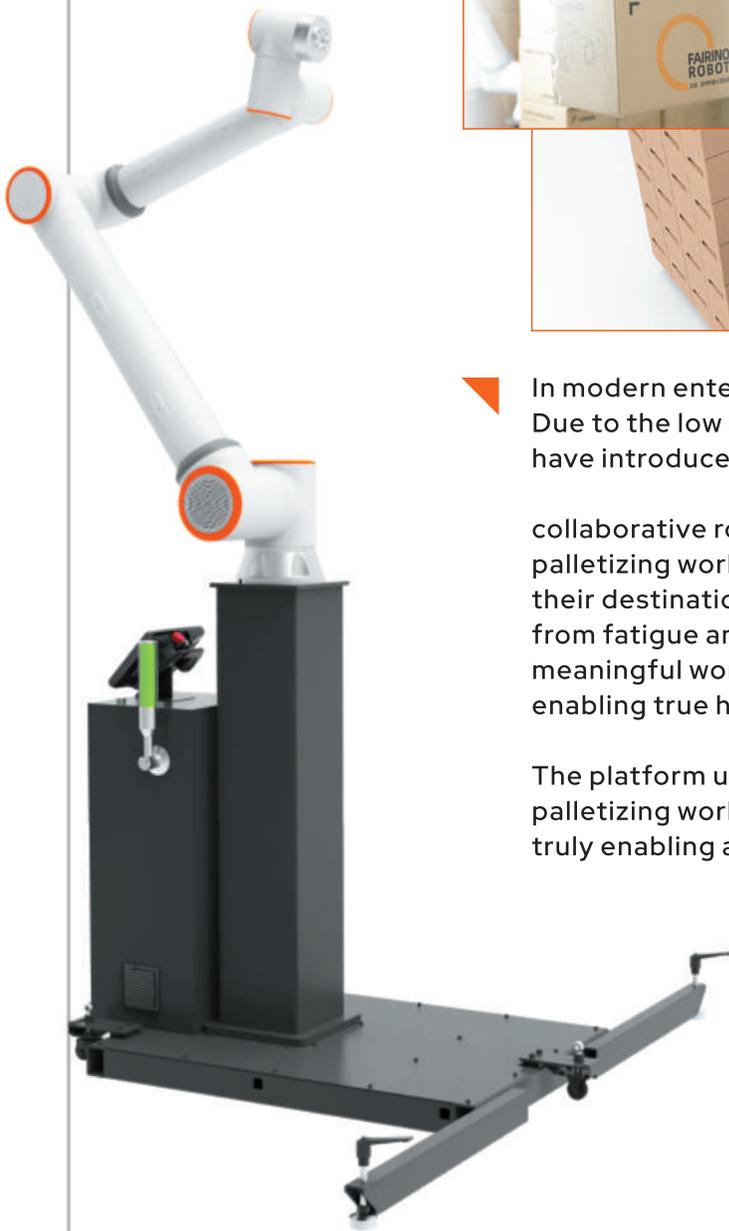

It has good technical performance. The cabinet must be resistant to vibration, impact, corrosion, dust, water, and radiation to ensure stable and reliable operation of devices. Good usability and safety protection facilities, easy operation, installation and maintenance, and to ensure the safety of the operator

IP Classification	IP65
Operating Environment Temperature	0°C - 45°C
Minimum Positive Pressure	100pa
Maximum Positive Pressure	1000pa
Rated Input Voltage	KW/48VDC/A
Maximum Leakage	15L/Min
L*W*H	682*500*1100 (Incl. alarm light 1286)
Weight	75kg
Materials	Carbon Steel + Stainless Steel
Cabinet Volume	126L
Ventilation Flow Rate	120L/min
Ventilation Time	14 min
Protective Gas	AIR
Explosion-proof Cabinet Certificate	CE22.7131

INDUSTRY

PALLETIZING SOLUTION

Abundant welding process kits with a variety of welding technologies, seam welding, straight welding, oscillating welding, arc welding, and multi-layer multi-pass welding. It also incorporates intelligent welding technologies for wire positioning and weld seam tracking, significantly enhancing welding efficiency and ensuring welding quality.

- In modern enterprises, palletizing work is very common. Due to the low efficiency of manual handling, many companies have introduced robotic palletizing systems to automate this task.

collaborative robots can perform round-the-clock automated palletizing work, effortlessly and quickly transporting goods to their destinations, saving time and energy. This frees employees from fatigue and repetitive tasks, allowing them to engage in more meaningful work. Additionally, there is no need for safety barriers, enabling true human-robot collaboration.

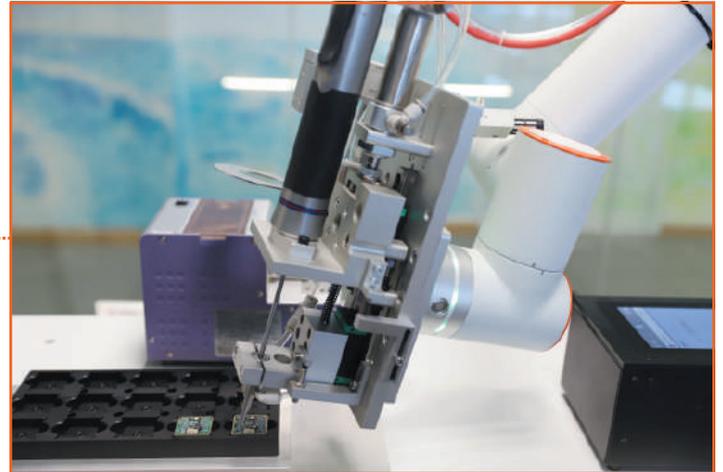

The platform utilizes a six-axis collaborative robot to accomplish palletizing work, offering easy deployment and quick utilization, truly enabling a plug-and-play experience.

- 10-MINUTE ULTRA-FAST PROGRAMMING SWITCHOVER
- VARIOUS PALLETIZING PACKAGES TO MEET INDIVIDUAL NEEDS
- OVER 30% PRODUCTIVITY INCREASED IN 7*24 HOUR OPERATION

I SCREW TIGHTENING SOLUTION

Combined with the end intelligent tightening device at the end, it achieves adjustable, controllable, and programmable torque, making it suitable for screw tightening in various scenarios. It can stably, efficiently, and accurately complete the production process, greatly reducing repetitive labor for workers and supporting data traceability.

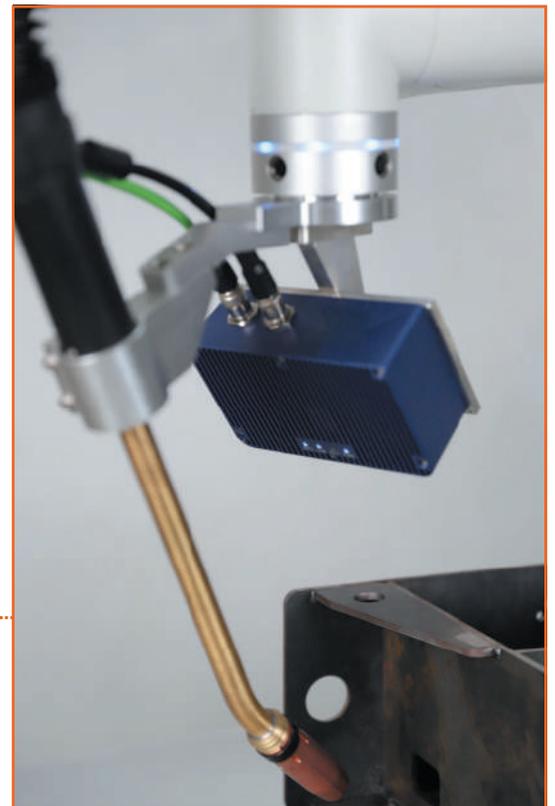

- ▼ SAFE AND CONVENIENT
- ▼ FLEXIBLE DEPLOYMENT
- ▼ FLEXIBLE FORCE CONTROL
- ▼ HIGH EFFICIENCY IN PRODUCTION

I WELDING SOLUTION

Abundant welding process kits, with a variety of welding technologies such as spot welding, seam welding, straight welding, oscillating welding, arc welding, and multi-layer multi-pass welding. It also incorporates intelligent welding technologies for wire positioning and weld seam tracking, significantly enhancing welding efficiency and ensuring welding quality.

- ▼ ULTIMATE SAFETY
- ▼ FLEXIBLE DEPLOYMENT
- ▼ REDUCED ENTRY BARRIERS
- ▼ MULTI-AXIS COORDINATION
- ▼ HIGH PRODUCTION EFFICIENCY

APPLICATION

CONVEYOR BELT SOLUTION

- ▼ ENHANCE WORK SAFETY
- ▼ DATA RECORDING AND TRACEABILITY
- ▼ REAL-TIME MONITORING AND FEEDBACK
- ▼ IMPROVE PRODUCTION EFFICIENCY
- ▼ REDUCE ERROR RATE AND LOSSES
- ▼ ACCURATE TRACKING AND IDENTIFICATION

PICK AND PLACE SOLUTION

Material handling robots can improve production efficiency, quality, and safety, reduce labor intensity, and provide flexibility and adaptability, bringing higher benefits and competitive advantages to businesses.

EDUCATIONAL SOLUTION

The platform includes common functions in the industrial field, such as gluing, tightening, and material handling, closely aligning with actual production line scenarios. It allows students to experience the real factory atmosphere up close in the classroom, making it an invaluable collaborative robot training platform in the field of education.

GLUE DISPENSING SOLUTION

- Paired with an intelligent dispensing device at the end effector, it enables precise operations and is suitable for precise gluing and dispensing tasks in various scenarios. It can achieve stable, efficient, and accurate adhesive application, ensuring the quality of the adhesive work. This greatly reduces repetitive labor for workers and protects their health.

COMMERCIAL

REHABILITATION SOLUTION

It has achieved integration of upper limb rehabilitation and lower limb exercise, reducing the barrier to entry through the reproduction of motion trajectories. By recording real-time feedback data, it significantly enhances safety performance. With various mode settings, it makes rehabilitation treatment more targeted, leading to a significant improvement in rehabilitation efficiency.

- ▼ ULTIMATE SAFETY
- ▼ OPEN PLATFORM
- ▼ DATA TRACEABILITY
- ▼ REDUCED ENTRY BARRIERS

MOXIBUSTION SOLUTION

It fully replicates the five major moxibustion techniques, offering hovering moxibustion, sparrow pecking moxibustion, rotating moxibustion, reciprocating moxibustion, and meridian moxibustion, thus reducing the barrier to entry for moxibustion. With the latest certifications, it is equipped with end collision detection, temperature control, and infrared distance measurement, providing triple protection to ensure the safety of moxibustion. It also has a built-in suction device to prevent inhalation of smoke and dust during the moxibustion process.

- ▶ ULTIMATE SAFETY
- ▶ FLEXIBLE DEPLOYMENT
- ▶ EFFICIENT MOXIBUSTION
- ▶ LOWER BARRIER TO ENTRY

AUTOMATED TEA SOLUTION

Collaborative robots can be applied in various types of new retail scenarios and can be customized according to different scenario requirements.

Benefits include :

Cost-saving :

They replace manual labor, reducing manpower costs while increasing work efficiency.

Consistent tea brewing :

They ensure consistent taste regardless of different operators or different time points, eliminating variations caused by human factors.

Entertainment value :

The robotic performance brings enjoyment to consumers, while employees can focus on more fulfilling and higher-paying jobs.

Cost-effective :

They have low costs and provide a quick return on investment, resulting in good economic benefits.

Small footprint :

They occupy less space, resulting in higher space utilization and adaptability to various innovative business models.

INTELLIGENT WELDING WORKSTATION

Open a new journey of convenient welding with one click

FAIRINO's digital welding process software kit supports various welding techniques, fully meeting the welding needs of different scenarios. The programming-free automatic welding platform developed by FAIRINO can automatically locate welding seam positions, conduct simulation rehearsals in advance, identify problems promptly, and mitigate risks. During the welding process, real-time welding seam deviation compensation is performed to ensure the consistency and precision of the welding operations.

I MOBILE WELDING SOLUTION

The mobile welding solution integrates core equipment units such as a mobile trolley, magnetic base, SMART TOOL, and six-dimensional torque sensor, and each equipment unit works together to give full play to its respective advantages and bring a new experience to welding work.

APPLICATION ADVANTAGES

- ▶ High flexibility
- ▶ Easy Operation
- ▶ Precision control
- ▶ Improved Efficiency

APPLICATION SCENARIOS

Suitable for precision welding tasks in complex spatial structures

- ▶ Building steel structure
- ▶ Shipbuilding
- ▶ Sheet Metal Industry
- ▶ Electronics Manufacturing
- ▶ Production of auto parts

WELDING ROBOT YS10-1440-W

Faster, more accurate and more reliable. Suitable for all types of CO2/MAG/MIG/TIG welding and plasma cutting

SPECIFICATION

Model No.	YS10-1440-W
Number of axes	6
Maximum payload	10kg
Approx. weight	176kg (without Cabinet or welding machine)
Repeatability	± 0.05mm
I/O terminals	16 digital inputs/outputs 2 analog outputs

6-AXIS HANDLING ROBOT YS20-1840

Faster, accurate and reliable. Suitable for pick-n-place, machine tending, palletizing and painting

SPECIFICATION

Model No.	YS20-1840
Number of axes	6
Maximum payload	20kg
Approx. weight	260kg (without Cabinet or welding machine)
Repeatability	± 0.08mm
I/O terminals	16 digital inputs/outputs 2 analog outputs
